

Gene List Analysis Report

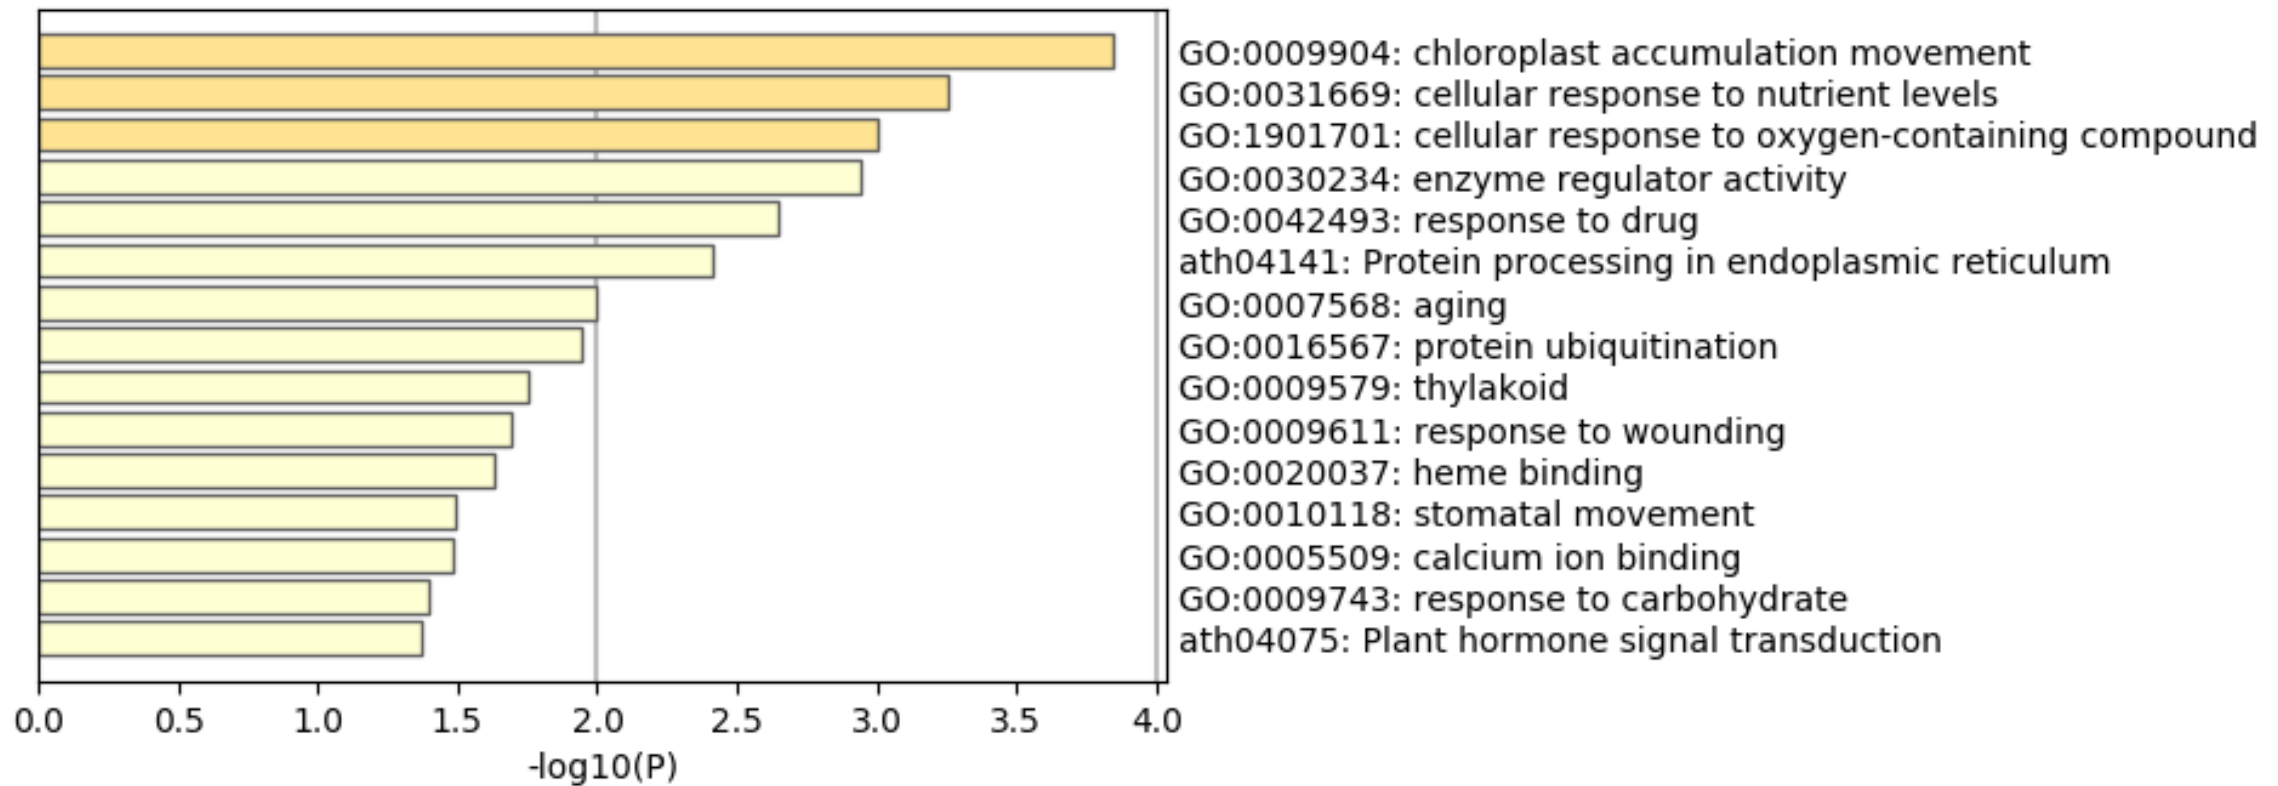

Hint: Each slide has
notes that explain
the analysis!

Gene List Summary

You gene list contains 111 identifiers, 111 human Entrez Gene IDs.

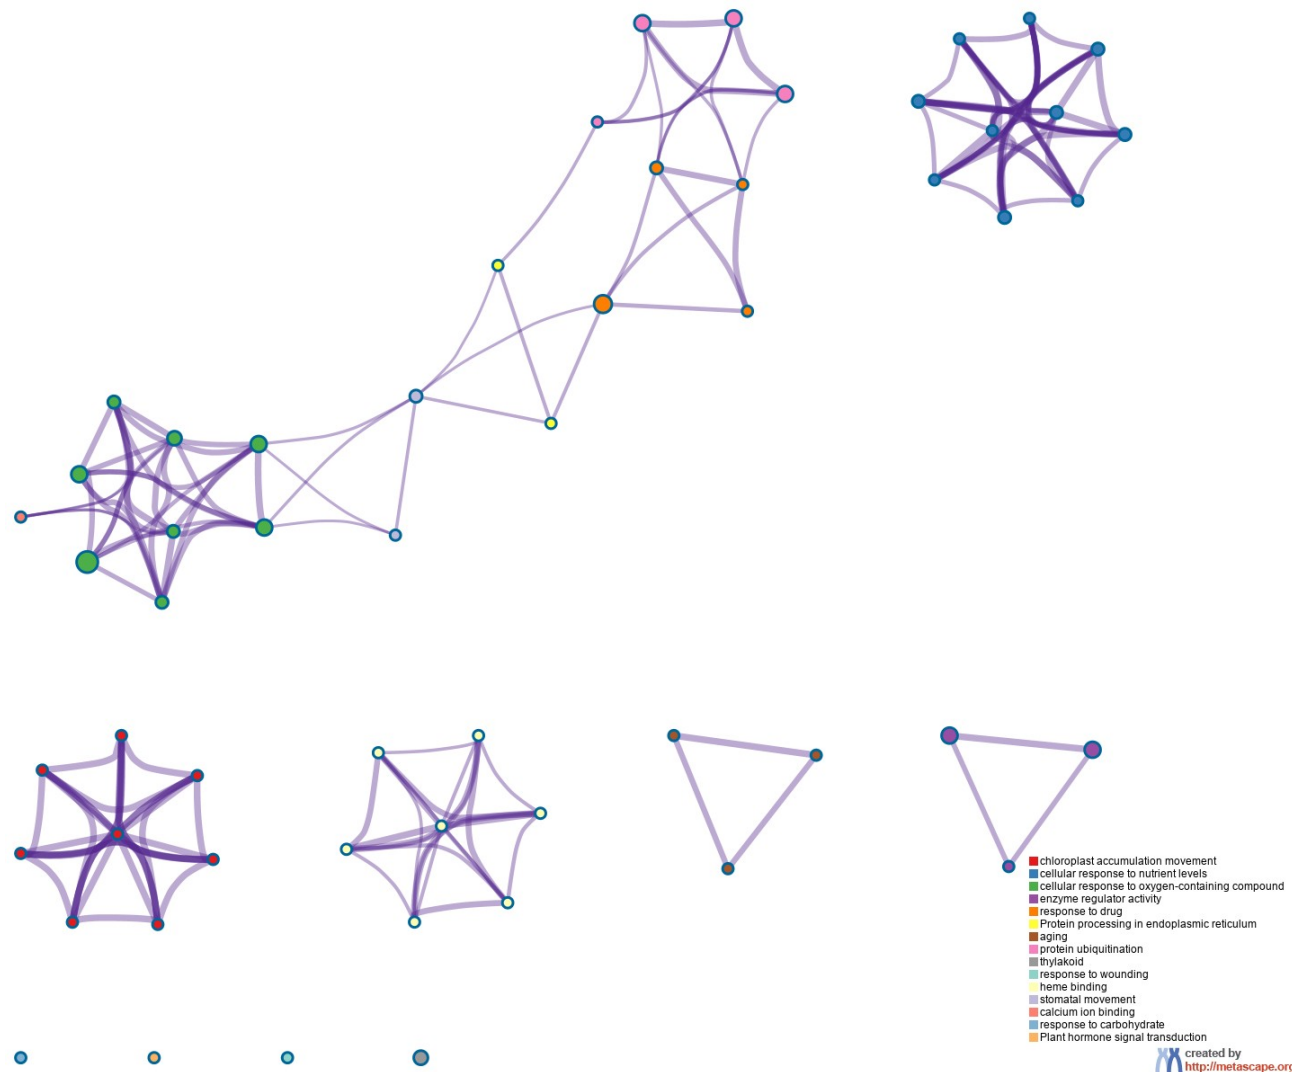

Please check online [Metascape User Manual](#) for explanation of each annotation field.

Enriched Ontology Clusters

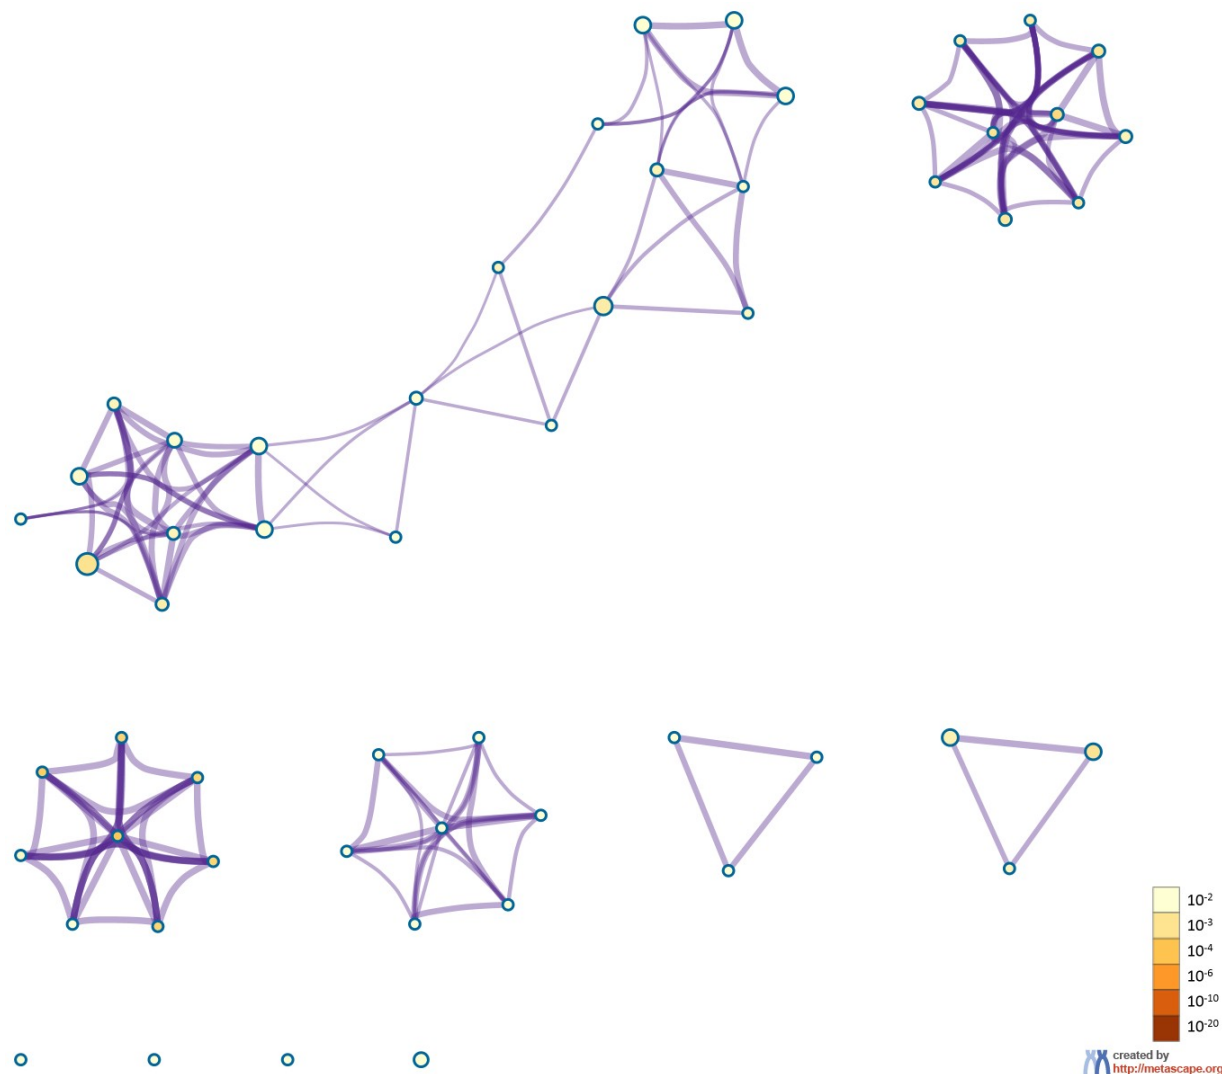

Enriched Ontology Clusters

Colored by Cluster ID

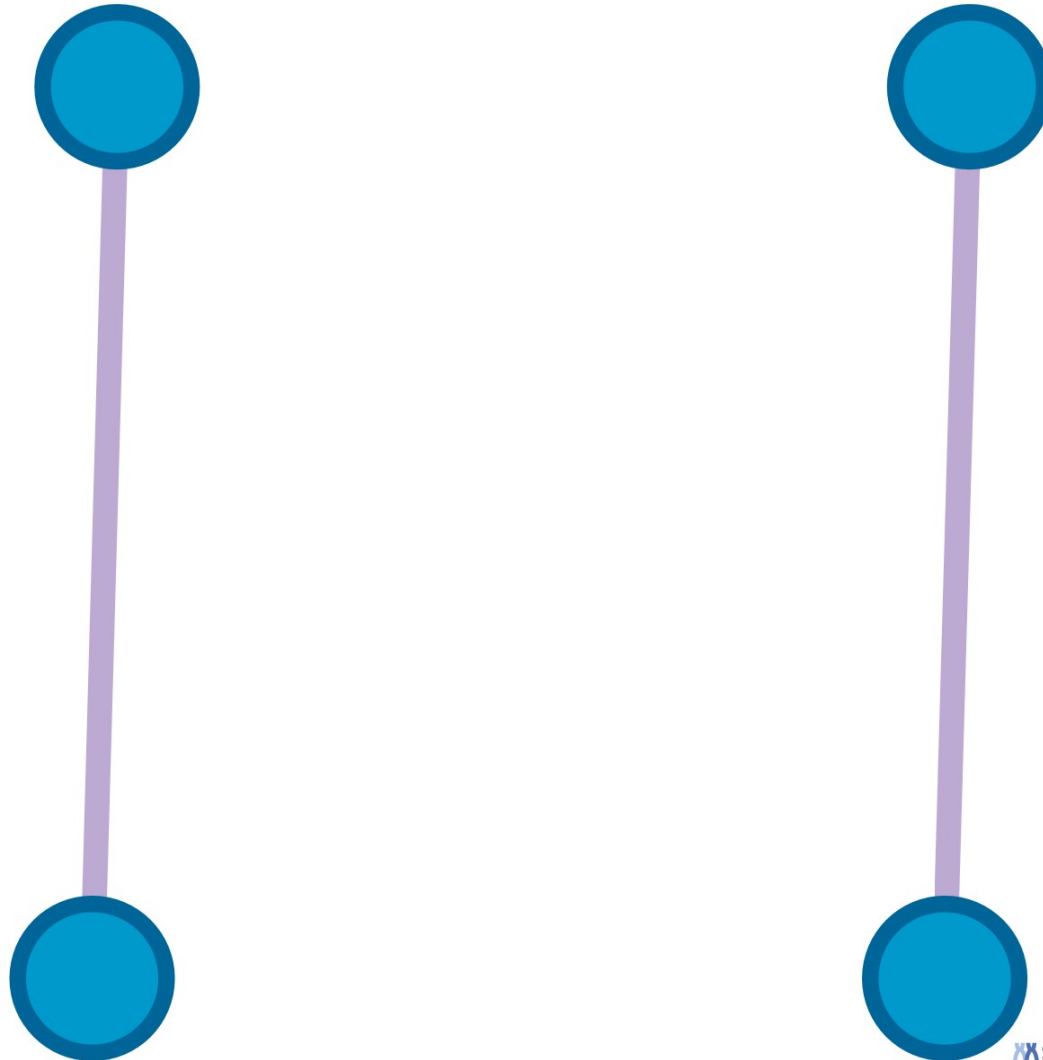

Enriched Ontology Clusters

Colored by p-Value

Protein-protein Interaction Network

Hint: If you have multiple related gene lists, upload them in one Excel file will trigger meta analyses.

Easy, Fresh & Free

- Submit gene identifiers, one click on Expression Analysis. Done!
- Interpretable results: visualizations, methods, pptx, xlsx, zip

Best Practices for Gene List Analyses

- Rich annotations for thousands of genes at once
- Pathway & process enrichment analysis
- Protein-protein interactome network analysis
- Overlap analysis across multiple gene lists
- Common and unique pathways across multiple studies
- Support key model organisms
